

### **Community and Living Well Together**

*The miracle teaches us that Jesus and his disciples saw a need and gave up their time to serve the community. The disciples cared for those around them. The people sat down in groups of fifty and the disciples moved around in pairs serving them food.*

*Living well and sharing basic necessities: the miracle helps us to consider our behaviours of team work and sharing. We engage with others with **honesty** and **respect**. We help our children to understand that they have an impact on whomever they speak to. This can be seen in their passion to raise money for charity, to impact our local community, the dedication that no matter their physical situation that they will sacrifice their comfort for the good of others, and with their kindness to give things up for the benefit of those less fortunate than themselves. Our links with all Saints Church and the local community shout our goal to be a friend to the world.*
